

5TH ANNUAL

The Bull Sale

FRIDAY **MARCH 16** 2018

1 PM AT THE FARM, CROSSFIELD, ALBERTA

OFFERING 69 YEARLING ANGUS BULLS

General Information

BOARD/DELIVERY: SSF will feed all bulls until April 15, 2018 at no additional cost to the buyer. If the buyer wants the bull at a later date than April 15 arrangements can be made for SSF to board the bull at a fee of \$3.00 per day per head. SSF will deliver all bulls in Western Canada at no charge to the buyer. SSF will assist in arranging delivery and cost share to Ontario, Quebec, Maritimes and U.S. destinations.

INSURANCE: The bull(s) become the property of the buyer as soon as the bull is sold. Insurance will be available sale day and Scott Stock Farm Ltd. requests all bulls staying at the farm for a later delivery date be insured. SSF is not responsible for injury or death.

SEMEN: SSF retains half semen interest in all bulls.

TERMS: Terms of sale are cash or cheque. All bulls must be settled for at the conclusion of the auction.

BULL HEALTH/GUARANTEE GUIDELINES: All bulls will have passed a satisfactory semen test and visually appraised for soundness by a licensed veterinarian prior to sale day. Bulls, if failing to be breeders, will be replaced by a bull of equal value and quality or a sale credit will be given towards the purchase of another SSF bull. No refunds will be given. Scott Stock Farm Ltd. will follow the terms and conditions as stated in the Canadian Angus Association's Breeders Guarantee Guidelines on all bulls sold. All bulls are on a complete herd health program including Ivermectin at weaning and again in January.

LIABILITY: Scott Stock Farm Ltd., its owners or employees accept no liability for accidents that may occur or assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

On behalf of everyone at Scott Stock Farm we welcome you to our 5th Annual Bull Sale. This year we have a great selection of deep, thick cow bulls. Plus a great set of heifer bulls that will calve easy and still have growth and muscle.

We have some different sires from the norm in the Angus breed. With our extensive use of Artificial Insemination, we have hand picked these sires to breed our cows to which have high recorded accuracies. This is making our entire herd stronger faster. We are true believers in the females that our bulls are out of. We are working hard every year to improve fertility, feet and udders in our cow herd. We're of the mindset that our 1st and 2nd calvers should be some of our best genetics. 42% of our sale bulls this year are out of 1st or 2nd calvers. We are very proud of this.

In some of the Bull footnotes you will notice we refer to Elite & Premier Cow status. This is a program of the Canadian Angus Association to identify superior cows in the breed. This year we calved 75% of our herd in the first breeding cycle. Our cow herd swath grazes for 3 months leading up to calving then goes on a TMR. Our bulls are fed a TMR of silage, hay and pellets. This has them in just right condition for sale day.

I recommend stopping to see the bulls and the cows before sale day. Give us a call to talk about the type of bulls and your requirements for your herd. We appreciate all repeat and new customers that choose to buy bulls from us. Please be our guest for steak and pie starting at 11am.

See you sale day.

Arsenal was bred by Connealy Angus in Nebraska, a large operation with a deep selection of AI sires and a top source for Angus genetics. Packer 547 was very popular for his quiet disposition and fertility. On the cow side is Forward, a very complete bull known for calving ease, growth, muscle and disposition. Arsenal is a wide topped, deep flanked bull with depth and tremendous growth and eye appeal. He will sire thick meaty steers and top replacement heifers.

Unanimous has sired long made bull calves with good feet and legs. His calves have loads of volume and muscle and are very stylish. Unanimous has a very nice head and is a true Angus beef bull. We sold 9 bulls last year that averaged \$6000. We are calving his first set of daughters and they are very feminine and moderate framed with gorgeous udders. His females are long and deep bodied.

Final Solution is a deep bodied bull with a lot of overall muscle mass carrying down well into his bottom third quarter. With growth and maternal strength he will sire steers with muscle and heifers that will work in your herd for years to come. He goes back to an Angus living legend "Final Answer". Final Answer was the No.1 registration sire in the breed for 2012. He is the sire of moderate, efficient replacement females with beautiful udders.

Network 55X was retired this fall after walking our breeding pastures for 6 good years. This bull has added lots of performance to our herd. He's as long as a freight train, wide topped as they come, a deep quarter with a lot of muscle. Excellent feet and flawless structure. We have sold many bulls sired by 55X in past years. This year he has 2 bulls that will be his last to sell. In last year's sale he sired lot 131 that sold very well to Kevin Alder, Alder Ranches.

Here's a long made bull with top and width. Lots of fertility and longevity in this cow family. The maternal grand dam 2K was one of Camille's favorite cows. We retired her at 14 years old after producing 12 calves. One of them being 36's mom, 891X. So far she is filling in the steps of 2K with 6 calves registered to date!!

Platinum has a lot of muscle. He's big topped and wide based. He has a big foot and is very sound. He has passed these traits onto his progeny. 2017 was our first offering of Platinum calves and they sold like hot cakes - 16 sons averaged \$5900. We are calving his first set of females right now and they are beautiful, moderate females that have a lot of rib and excellent udders.

Spartacus was a crowd favorite in the Bieber's 2014 sale selling to Accelerated Genetics. Bieber's reported that Spartacus is a great disposition bull stacked for profit. Powerfully made and very stout boned, Spartacus was heavily used in Biebers program in the 2015 breeding season. Spartacus is a very complete bull that leaves a breeding program in a very good position going forward. He's a powerful made long bull with excellent performance. Stacked for profit he records EDPs that rank in the top 3rd of the breed or higher for 9 traits. He has a great disposition and passed it onto his progeny. A bull that does a lot of things right. His easy doing steer calves will have added length. And his heifer calves will be deep ribbed attractive females.

This 1st calver - SSF 111C - did a great job on this Bull. Lot 38 weaned off at adjusted weight of 687 lbs. Lot 38 is wide based and has lots of body capacity. Lots of great genetics in both sides of pedigree. We sold lots of bulls out of the grandsire "Ted Wander 7A". And the MPV cows have been great asset to our herd.

Take a look at 45E. He is a very wide topped bull with big barrel. Good feet on this bull which is proven true on the cow side. The Kari cow family is very established & powerful in our herd. Her bull calf sold in the sale last year to Watmough Ranch. Lots of genetics in this pedigree from top Canadian herds.

Study the pedigree on lot 56. It is packed with top, high accuracy genetics. We are the only operation offering bulls out of the Spartacus blood line. The Spartacus sire himself records EDPs that rank in the top 25% or higher for eight traits. He is one of the Red Angus breed's elite curve bending young sires. 56 is a long bull with big hip and a lot of performance.

242E is an attractive bull with good overall thickness and balance. Just a 78 lb. BW out of an 8 year old Elite cow! The cow 898X has had 3 heifer calves and 3 bull calves. All 3 of her bull calves have made the sale 3 consecutive years in a row! Her calf last year sold to Matt & Kristi McKinnon. And the year before that to Circle J Ranches. Great producing cow family!!

Please bring this catalog
with you to the sale

EPDS

EXPECTED PROGENY DIFFERENCES

EPDs are an estimate of how future progeny of each sire can be expected to perform in each traits listed.

BW: Birth Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. Weaning weight is an indicator of growth from birth to weaning (205 days of age). The calf's growth during this period is influenced by its own ability to grow plus its mother's maternal abilities.

YW: Yearling Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MILK: Milk EPD - is an indicator of milking ability in daughters. It represents the differences in weaning weights of calves due to the amount of milk produced by their mothers. It is expressed in pounds of calf weaned.

TM: Total Maternal EPD - is a combination of the weaning weight and milk EPDs. It is calculated as: $1/2 \text{ Weaning Weight EPD} + \text{Milk EPD} = \text{Total Maternal}$. This EPD represents the differences in weaning weights between calves due to mothering and milking ability of their dams.

CE: Calving Ease Direct - predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the Calving Ease EPD, the more likely it is that the animal's calves will be born without assistance.

CANADIAN AVERAGE EPDS - FEBRUARY 2018 BLACK ANGUS CALVES BORN IN 2017
