JON & CAMILLE, SHELBY & BOW SCOTT BOX 1541, CROSSFIELD, AB TOM 0S0 JON CELL: 403.333.1790 CAMILLE CELL: 403.369.1791

Welcome to our 9th Annual Bull Sale edition. We've never been so excited for the future of our operation as we are right now!! We are over 80% done calving out the most cows we've ever calved in one year. It has been one of the best calving seasons in the last 5 years. The weather has been perfect for the most part and the calves are already

SHELBY, CAMILLE, BOW & JON

running around and growing like weeds. 2021 was a trying year with lack of moisture for most producers. Pastures ran out of grass much earlier than usual. We are praying for moisture for all of us. We have never creep fed our bulls. Our mother cows worked darn hard this past summer with very little grass to bring you a top-quality set of bulls that are built to last at your operation.

Our bull pens have an ideal combination of genetics from leading AI sires sourced from across the continent. We also have outstanding bulls out of our own walking herd bulls. These herd bulls are top quality Canadian sires that we hand selected for use on our specific cow herd.

With a little rain from mother nature, we are hopeful for the future in agriculture and rising cattle and grain

We are very grateful for all our bidders and buyers who have supported our program over the past 25 years prices for all. being in the purebred Angus business. We have learned a lot about Charolais in our first year and are pleased with our offering. Thank you for your interest.

Come view the bull pen before sale day to be entered in \$500 sale credit! Once again we are offering our very popular Loyalty Program. Bring a new buyer with you to receive credit towards both your purchases.

We take pride in our excellent customer service – whether its delivering our bulls, helping at your brandings and round ups, summer pasture tours or the SSF steak spice... we want to partner with you.

We always look forward to meeting new customers as well as our loyal long term followers on Friday March 18th, 2022.

Hope you can join us!

Jonathan & Camille

WARRANTY & GUARANTEE

In our opinion, every purebred breeder has an obligation to stand behind their bulls to be guaranteed breeders. We would not be in business if we didn't stand behind the bulls we sell. Not only do we follow the guidelines of the breeders guarantee as outlined by the Canadian Angus Association, we go above and beyond. If you are ever not satisfied with your purchase, please give us a call. Every situation is different but our promise to you is we will work with you and we will stand behind our bulls. Accidents & injuries happen ... its just part of the business. We want to support our customers.

SVR Distinct was a feature bull in South View's 2019 bull sale. He is a big stout bull with lots of body capacity. He has added a lot of thickness which shows right at birth!! He has a near perfect foot on him. He is one of the best Red Angus bulls we've bought. Distinct is now a 4 year-old bull and looks just as good as the day we bought him!

Harvestor will add length of body with added muscle, spring of rib, depth and a great disposition. We selected Harvestor out of the 2018 Leeuwenburgh Bull Sale as the \$50,000 high selling bull. He is packed with natural thickness with dimension and bone. He will add length of body and good foot structure. Harvestor has a pedigree that blends fresh outcross genetics with proven maternal greatness of bulls like Rob Roy, New Trend and Masterplan.

The EPDs listed in this sale catalog are the product of the Canadian AngusONE Genetic Evaluation, calculated in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. EPDs are values that predict how the future progeny of an animal will perform relative to the progeny of other animals in the same breed, expressed in the units of that particular trait. For example, weaning weight is measured in pounds thus the WW EPD is expressed in pounds. Another way to look at it is EPDs measure an animal's value as a parent.

EPDs are based on pedigree information and performance data such as weight information and are then compared to other animals within a contemporary group. The different traits are adjusted to a standard age to ensure that all animals are equal when compared. The right EPD for you will depend on your cow herd, your management and your breeding goals. For more information on using EPDs please contact the Canadian Angus Association, at 1-888-571-3580.

The Brand You Can Trust

SELECTING THE PERFECT HEIFER BULL AT SSF

Proper heifer bull selection is absolutely crucial. Calving problems of any kind are costly in man hours and financially to the livestock producer. The most accurate information available to select a herd bull are EPDs (Expected Progeny Differences). EPDs are science-based facts and figures calculated by a breed association based on actual weights submitted by breeders.

The majority of SSF heifer bulls are from A.I. sires with high accuracy numbers for calving ease. SSF follows a stringent selection process when selecting sires for calving ease in our own herd. SSF follows this process so we can guarantee easy calving bulls based on factual information to our customers.

Mindbender was the high selling bull we purchased from Bar-H Land & Cattle's 2020 sale. He is a long, deep bodied bull with a very quiet demeaner. A calving ease bull with performance and stoutness. We selected this bull for his maternal strength, he is out of a 14 year old cow that was flawless in her make up and foot structure.

Homegrown is a balanced maternal trait-oriented sire. Backed by a tremendous cow line at Ellingson Angus, North Dakota. He is siring cattle that are deep and thick with above average foot quality. He is a top calving ease sire. This sire group should stay moderate to use on heifers.

Profound was the crowd favourite and top selling bull from the 2019 Ellingson Angus bull sale. This sire group has muscle shape, depth of body, outstanding thickness, and superior foot quality. Profound will add pounds to your steer calves and leave you a tremendous set of broody females. Profound semen is very hard to come by and we were grateful the opportunity to use him. We mostly got females last year, which are looking to become some of our foundation females for the future. Check out these Profound sons as they are hard to come by and are some of the very best Angus genetics in production today.

EPD DEFINITIONS

EPDs (Expected Progeny Differences) are an estimate of how future progeny of each sire can be expected to perform in each traits listed.

CE: Calving Ease Direct - predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the Calving Ease EPD, the more likely that the animal's calves will be born without assistance.

BW: Birth Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. Weaning weight is an indicator of growth from birth to weaning (205 days of age). The calf's growth during this period is influenced by its own ability to grow plus its mother's maternal abilities.

YW: Yearling Weight EPD - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

MILK: Milk EPD - is an indicator of milking ability in daughters. It represents the differences in weaning weights of calves due to the amount of milk produced by their mothers. It is expressed in pounds of calf weaned.

From Our Vets

Welcome to the Scott Stock Farm 2022 Bull Sale!

Everyone at Didsbury Vet Services is proud to be involved in the herd health program at Scott Stock Farm. All cattle on the farm are part of a vaccine, deworming and breeding soundness protocol, which sets these bulls up for success on the farm and at their future homes.

Lifelong health of these bulls is a priority at Scott Stock Farm and this starts with their hardworking mammas. The cows are on an annual killed vaccine program to ensure each dam has a robust immunity and their colostrum is loaded with antibodies for the calves as they hit the ground. At fall preg checking all cows receive a killed IBR/BVD vaccine, 8 way Clostridial vaccine, and Scour Bos 9. Topical ivermectin is applied at this time to establish internal and external parasite control.

All calves receive vaccines to prevent respiratory disease and Clostridial infections to allow them to reach their maximized growth. This modified live calf vaccine protocol involves Bovi-Shield Gold One Shot (IBR, BVD, PI3, BRSV, and Mannheimia) and Ultrabac 7/Somubac (Clostridial diseases and Histophilus). Calves first receive these vaccines at pasture turn out in the spring and are boosted again right before weaning in the fall. Internal parasite control is established with LongRange which is given with spring vaccines. This product ensures the calves are free of internal parasites for up to 150 days, and sets them up to thrive throughout the winter.

Prior to the bull sale we perform a complete breeding soundness exam and semen evaluation of all bulls. Each bull is examined to ensure they are sound, have a strong confirmation, are in excellent body condition, and are free of any visible defects. The testicles, epididymis, and internal sex glands are palpated prior to semen collection. A scrotal measurement is performed to confirm all bulls meet minimum requirements for yearling Angus bulls. The penis is assessed during semen collection to verify each bull can protrude normally and they are free of warts or any other physical defects. Sperm motility and morphology are evaluated for each individual bull. Each bull is determined satisfactory or fit to breed if they pass their physical exam, scrotal measurement, sperm motility, and have 70% or higher in normal sperm morphology. If a bull does not meet the minimum requirements they will be deferred, which means they will be reassessed and confirmed to pass prior to leaving the farm at a later date.

The amount of hard work and care put into the health and wellbeing of cattle on Scott Stock Farm is extraordinary, and it is apparent in this excellent group of bulls. We are grateful to have a minor part in the production of these bulls and look forward to being involved in the future of the Scott Stock Farm herd. Please call Dr. Meg Verbeek or Dr. Andy Mencarelli at Didsbury Vet Services if you have any questions regarding the health program for these bulls.

RED WFL MERLIN 018A

General Information

BOARD/DELIVERY: SSF will feed all bulls until April 15, 2022 at no additional cost to the buyer. If the buyer wants the bull at a later date than April 15 arrangements can be made for SSF to board the bull at a fee of \$3.00 per day per head. SSF will deliver all bulls in Alberta at no charge to the buyer. If delivery is outside of Alberta, please contact Jonathan to discuss delivery terms & conditions.

INSURANCE: The bull(s) become the property of the buyer as soon as the bull is sold. Insurance will be available sale day and Scott Stock Farm Ltd. requests all bulls staying at the farm for a later delivery date be insured. SSF is not responsible for injury or death.

SEMEN: SSF retains half semen interest in all bulls.

TERMS: Terms of sale are cash or cheque. All bulls must be settled for at the conclusion of the auction.

DISCOUNTS: Bulls must be paid for in full on sale day to receive discounts. Discounts not applied to partnership bulls.

BULL HEALTH/GUARANTEE GUIDELINES: All bulls will have passed a satisfactory semen test and visually appraised for soundness by a licensed veterinarian prior to sale day. Bulls, if failing to be breeders, will be replaced by a bull of equal value and quality or a sale credit will be given towards the purchase of another SSF bull. No refunds will be given. Scott Stock Farm Ltd. will follow the terms and conditions as stated in the Canadian Angus / Canadian Charolais Association Breeders Guarantee Guidelines on all bulls sold.

All bulls are on a complete herd health program including Ivermectin at weaning and again in January.

LIABILITY: Scott Stock Farm Ltd., its owners or employees accept no liability for accidents that may occur or assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.
