FRIDAY **MARCH 20** 2020

1 PM AT THE FARM, CROSSFIELD, ALBERTA

OFFERING 70 YEARLING ANGUS BULLS

1G

25G

SSF

SSF

# General Information

**BOARD/DELIVERY:** SSF will feed all bulls until April 15, 2020 at no additional cost to the buyer. If the buyer wants the bull at a later date than April 15 arrangements can be made for SSF to board the bull at a fee of \$3.00 per day per head. SSF will deliver all bulls in Alberta at no charge to the buyer. If delivery is outside of Alberta, please contact Jonathan to discuss delivery terms & conditions.

**INSURANCE:** The bull(s) become the property of the buyer as soon as the bull is sold. Insurance will be available sale day and Scott Stock Farm Ltd. requests all bulls staying at the farm for a later delivery date be insured. SSF is not responsible for injury or death.

**SEMEN:** SSF retains half semen interest in all bulls.

**TERMS:** Terms of sale are cash or cheque. All bulls must be settled for at the conclusion of the auction.

**BULL HEALTH/GUARANTEES GUIDELINES:** All bulls will have passed a satisfactory semen test and visually appraised for soundness by a licensed veterinarian prior to sale day. Bulls, if failing to be breeders, will be replaced by a bull of equal value and quality or a sale credit will be given towards the purchase of another SSF bull. No refunds will be given. Scott Stock Farm Ltd. will follow the terms and conditions as stated in the Canadian Angus Association's Breeders Guarantee Guidelines on all bulls sold.

All bulls are on a complete herd health program including Ivermectin at weaning and again in January.

**LIABILITY:** Scott Stock Farm Ltd., its owners or employees accept no liability for accidents that may occur or assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of accidents or loss of property.

**FREE BOARD  
UNTIL APRIL 15, 2020**

SHELBY, JON, CAMILLE & BOW

On behalf of Scott Stock Farm we would like to invite you and your family to our 7th Annual Bull Sale. I would like to start off with saying Thank you to our valued customers and friends for many years of support and confidence in our program. Thank you for choosing our genetics and for choosing our program.

Our #1 goal is to raise top quality Angus bulls for cattle producers. The top traits that we strive to offer our customers are easy calving genetics (almost 50% of our Black bulls are marked safe to use on heifers) and quiet temperament that are still structurally correct and have performance.

We are always working hard to improve our operation for genetic selection on feet and udders to produce sound, functional cattle that work in any operation.

Using proven AI (artificial insemination) sires, gives us a competitive advantage and more depth in our breeding program. Not every operation uses AI. It is time consuming and takes a long time to get conception rates high. Although it would be easier to kick out a clean up bull, this does not expand our genetics like it does through the use of AI'ing. We have a long history of AI'ing. My Dad taught the AI course at Alta Genetics for many years and when I worked on a Angus ranch in Australia we AI'ed hundreds of head daily. Now I get to use it on my own operation.

The sires we use have already been tested in numerous other herds. This allows us to evaluate their track record. Using these AI bulls gives us more accurate information and data for us to appraise them. We make a couple trips a year to look at AI sires and their progeny.

We are proud of the fact all our bulls are above breed average for weaning and yearling weight EPDs.

After all the work is done, we always look forward to hosting our annual sale. Its great to see everyone come out and enjoy a steak dinner that is one of the best meals you'll find!!!

Hope to see you there!

*Jonathan Scott*

Blacksmith was the \$24,000 high selling bull in the 2017 National Western Angus Bull Sale. He is deep in his ribcage and thick rumped with an exceptional genomic profile. His grandam is a full sister to the \$110,000 S A V Resource 1441; his third dam is among the highest income producing donors in the entire Angus breed. A calving ease sire with exceptional growth from birth to WW & YW; bonus is his high docility score. Blacksmith has a lot of eye appeal, muscle expression and thickness. Calves are born light with rapid growth.

Reserve is an impressive looking herd bull that will sire docile, eye catching females and bulls with tremendous shape, depth of body, excellent fertility and real world efficiency. First calving heifers at Leeuwenburgh's have nice udders, and are on track to making great mother cows. Reserve adds a lot of depth of body and muscle big time. He's an easy doing bull with a great temperament.

Unanimous has sired long made bull calves with good feet and legs. His calves have loads of volume and muscle and are very stylish. Unanimous has a very nice head and is a true Angus beef bull. We sold 9 bulls last year that averaged \$6000. His daughters are very feminine and moderate framed with gorgeous udders. His females are long and deep bodied.

One of our favourite bulls in the sale. We just can't say enough good about him. This first calf heifer worked hard on this performance bull. Look at his EPDs!!! The spread between light birth weight and heavy weaning & yearling weights is awesome. Can't wait to see what he does at your operation.

Harvestor will add length of body with added muscle, spring of rib, depth and a great disposition. We selected Harvestor out of the 2018 Leeuwenburgh Bull Sale as the \$50,000 high selling bull. He is packed with natural thickness with dimension and bone. He will add length of body and good foot structure. Harvestor has a pedigree that blends fresh outcross genetics with proven maternal greatness of bulls like Rob Roy, New Trend and Masterplan.

Spartacus was a crowd favorite in Bieber's 2014 sale selling to Accelerated Genetics. Powerfully made and very stout boned he is a very complete, powerful made, long bull with excellent performance. Stacked for profit he records EDPs that rank in the top 3rd of the breed or higher for 9 traits. He has a great disposition and passed it onto his progeny. A bull that does a lot of things right. His easy doing steer calves will have added length. His heifer calves will be deep ribbed attractive females.

PHOTOS & VIDEO TAKEN JANUARY 2020

Please note that the EPDs listed in this sale catalogue are the product of the new Canadian AngusONE Genetic Evaluation. These EPDs are calculated by Angus Genetics Inc in partnership with the American Angus Association. Therefore, EPDs for Canadian Red Angus, Canadian Black Angus, and American Black Angus animals are directly comparable to each other. This is a completely new base for Canadian Red Angus however, therefore, please be advised that the EPDs are not comparable to last year's EPDs for Red Angus. These EPDs are on a completely different scale, so please familiarize yourselves with the new Breed Average and with the new threshold number for traits of importance to you. The new AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at [www.cdnangus.ca](http://www.cdnangus.ca). The right EPD for you will depend on your cow herd, your management, and your breeding goals. For more information on using EPDs please contact your Association, the Canadian Angus Association, at 1-888-571-3580, and for more information about the genetics offered in this catalogue and what might best suit your breeding needs please contact the seller.

Actual	205 days	+1.2	+35	+60	+22	+39	+2.4

EPD DEFINITIONS

EXPECTED PROGENY DIFFERENCES

EPDs are an estimate of how future progeny of each sire can be expected to perform in each traits listed.

**BW: Birth Weight EPD** - expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**WW: Weaning Weight EPD** - expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires. Weaning weight is an indicator of growth from birth to weaning (205 days of age). The calf's growth during this period is influenced by its own ability to grow plus its mother's maternal abilities.

**YW: Yearling Weight EPD** - expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**MILK: Milk EPD** - is an indicator of milking ability in daughters. It represents the differences in weaning weights of calves due to the amount of milk produced by their mothers. It is expressed in pounds of calf weaned.

**TM: Total Maternal EPD** - is a combination of the weaning weight and milk EPDs. It is calculated as: 1/2 Weaning Weight EPD + Milk EPD = Total Maternal. This EPD represents the differences in weaning weights between calves due to mothering and milking ability of their dams.

**CE: Calving Ease Direct** - predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the Calving Ease EPD, the more likely it is that the animal's calves will be born without assistance.

# The Brand You Can Trust

## SELECTING THE PERFECT HEIFER BULL AT SSF

Proper heifer bull selection is absolutely crucial. Calving problems of any kind are costly in man hours and financially to the livestock producer. The most accurate information available to select a herd bull are EPDs (Expected Progeny Differences). EPDs are science-based facts and figures calculated by a breed association based on actual weights submitted by breeders.

The majority of SSF heifer bulls are from A.I. sires with high accuracy numbers for calving ease. SSF follows a stringent selection process when selecting sires for calving ease in our own herd. SSF follows this process so we can guarantee easy calving bulls based on factual information to our customers.
